Firmware Update history

[Nov 2026]
1.3.0 - Added two global setting options:
        "Output Phase (EQ-R)" and "Boost Switch Function".
      - Added six Midi CC commands:
          CC#99 - "Volume (L) Increment/Decrement"
          CC#100 - "Volume (R) Increment/Decrement"
          CC#101 - "Boost Level (L) Increment/Decrement"
          CC#102 - "Boost Level (R) Increment/Decrement"
          CC#103 - "Parametric EQ On/Off"
          CC#104 - "Simple/Pultec EQ On/Off"
      - Fixed a bug in Pultec EQ + Parametric EQ mode that rendered
        the Parametric EQ engine ineffectual.

[Aug 2026]
1.2.5 - Bugs fixes.

[Aug 2026]
1.2.4 - Extended the EQ curve viewing time to 25 seconds if the home
        screen is configured to show preset information.
      - Bugs fixes.

[Aug 2026]
1.2.3 - Added the "Home Screen Display" option in globals settings
        menu to let users specify the prefered information to be
        continously displayed on the home screen - EQ curve or
        Preset information.
      - Users are now given a chance to edit the preset title
        immediately following a preset save operation.
      - Improved MIDI reception handling robustness.

[July 2026]
1.2.2 - Preset title is now briefly displayed when the preset is
        selected via MIDI (PC message).

[June 2026]
1.2.1 - Improved MIDI reception handling.
      - Added 'PC Message Filter' option to Global Settings. User can
        use this to ignore PC message that calls the same preset that
        is currently active, avoiding a brief cut in the audio.

[Oct 2025]
1.2.0 - Preset title/number is now briefly displayed on preset call via
        MIDI or Aux switches.
      - Added 3 new MIDI CC functions:
          > Volume decrement/increment.
          > Boost Level decrement/increment.
          > Prototype decrement/increment.
      - Added 2-way communications with the Enieqlab editor software - now
        changes made on the pedal are immediately reflected on the editor.
      - Fixed Simple EQ parameter edit bug in Linked-Channel mode.
      - Fixed Parametric EQ band state indicator LEDs not correctly
        updated when switching from "Independent" to "Linked" channel

mode.
- Fixed Parametric EQ band state indicator LEDs not correctly updated during Copy or Swap operations.

[May 27, 2024]
1.1.0 - Updated for interfacing with the EnieqLab editor software.
- Added 'Load Next Preset' and 'Load Previous Preset' functions to Aux switches assignment.
- Added a mechanism to recover the display when the mangled-display issue occurs.

[Jan 16, 2024]
1.0.5 - Fixed the mangled-graphic issues during title editing.

[Des 7, 2023]
1.0.4 - Fixed the frequency label errors in the PultEQ mode.
- Fixed the Volume label errors when stacking EQs.

[Oct 29, 2023]
1.0.3 - Fixed a bug Midi change display function.

[Oct 19, 2023]
1.0.2 - Fixed a bug in the L/R Compare function.

[Oct 14, 2023]
1.0.1 - Added CC#88 through CC#95.
- Fixed a bug in Limiter menu where parameter changes were not displayed when channel focus is on channel R.
- Fixed a bug in Options menu where channel mode setting for booster and limiter were not saved properly.
- Fixed a Midi CC bug.

[Sept 21, 2023]
1.0.0 - First release firmware.
